

Website translations with a TYPO3 connection

Thanks to the seamless integration of the translation process into your TYPO3 system, we make it possible for your website to be translated as part of a smooth process. You can export all the content for translation out of TYPO3 in a matter of seconds and import the professional translation back in with a click of the mouse. This way, your TYPO3 page will always be kept up to date in all languages. And you won't have to waste time copying or formatting text.

Advantages

Save time and money

- No manual copying and pasting
- Straightforward process for exporting and importing translations, with the page structure and formatting retained
- TM system benefits (translation memories and terminology databases)
- Creation of translation files at the click of the mouse from the TYPO3 environment
- No duplicate translations: Content which has already been translated is automatically detected, saved and not translated from scratch

Publish new website content quicker online

- Thanks to automated and standardised translation processes, you can quickly publish your website online in all languages and always keep it up to date

Reduce your IT expenditure

- Simple implementation of the plug-in

Improve the quality of translations

- Existing translations are entered in our translation memory system
- The error rate is greatly minimised thanks to the automated entry of the translations

Company

Founded in 1994
160 employees
100 languages
> 2,000 language
professionals
> 5,000 clients

- Internal team of developers
- The latest translation technologies
- Customised corporate solutions
- Expert advice

Security

100% discretion and maximum security for your confidential data thanks to data hosted in Switzerland and ISO 27001 certified processes.

Prerequisite

The current localisation manager (l10nmgr), a TYPO3 extension which can be used to create content in multiple languages.

TYPO3 localization manager

The TYPO3 localization manager (l10nmgr) is an extension for the popular CMS TYPO3 for professional translation management. Content can be translated online, by exporting and importing Microsoft Excel files or by exporting and importing XML files for use with translation tools.

Translations with TYPO3

The TYPO3 localization manager (l10nmgr) extension can be downloaded for free from the TYPO3 Extension Repository and used to localize your TYPO3 website. Once you've installed the localization manager, you can use pre-defined filters to search for text that has already been translated or still needs to be translated in the TYPO3 backend.

Company

Apostroph Group is the leading language service provider in the DACH (Germany, Austria, Switzerland) region with a total of 10 sites across Switzerland and Germany. Today, more than 5,000 companies and institutions rely on Apostroph's expertise.
